

PTV Schools and Kindergartens // Address data for location questions

Information about the location of schools and kindergartens is important for the evaluation of residential property and for the placement of certain out-of-home posters. What advertising posters or direct marketing campaigns can be implemented near a school or kindergarten? Where would it make sense to set up a student support center? How can routes to school be made safer? Where would it make sense to set up a supermarket or a canteen?

PTV Kindergartens

- Approx. 50,000 data sets are available
- Attributes: public or private
- Number of kindergarten places and groups
- Four kindergarten types: crèche, day nursery, Kindergarten or after-school care center
- Kindergarten website
